# About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2024 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

## Disclaimers

### Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

### Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

### Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented. The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

#### Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Hostplus (the Fund) is committed to responsible investment across all its investment activities as we believe it helps us to better manage risk and optimise retirement outcomes for members. The Fund's approach to responsible investment is informed by its responsible investment beliefs, which are documented in our Responsible Investment Policy and implemented through an approach based on the following four pillars:

**ESG Integration:** The Fund is committed to ESG integration across all asset classes. ESG factors are taken into consideration during the fund's annual strategic asset allocation process and when setting investment objectives. In conjunction with its Asset Consultant, the Fund also reviews its investment managers' abilities to integrate ESG risks and opportunities into their investment decision-making process as part of the investment manager selection and monitoring process.

By integrating ESG factors in this way, we are better able to protect and optimise members' investments over the long-term.

**Active Ownership:** The Fund believes that active ownership is critical to the governance of investments over the long-term. The Fund established an active ownership program in order to positively influence company/asset behaviour and performance and therefore contribute positively to long-term investment returns. The Fund engages with companies primarily through its membership of the Australian Council of Superannuation Investors (ACSI) and engagement service provider Federated Hermes EOS, as well as through its investment managers.

Our proxy voting decisions may take into account a range of inputs such as voting guidance from specialist service providers, recommendations from our investment managers and based on the Fund's key engagement and voting principles as required. Rather than divest from a company or sector and lose influence, our preference is to retain exposure to a broad range of sectors and seek to create change within companies or sectors that we invest in through engagement.

**Building Australia's Future:** Unlisted assets continue to be an important part of the Fund's investment strategy. The Fund's unlisted assets portfolio includes assets that help to build and provide important infrastructure and services that directly contribute delivering financial returns to members.

As one of the largest Australian investors in venture capital, the Fund invests in areas including medical therapies, alternative food sources, collaborative tech, robotics and clean energy.

**Member values:** The Fund also has a Socially Responsible Investment Balanced Option which enables members to align investment of their superannuation with their personal values through the exclusion of investments in particular industries where practicable.

## Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
  - refinement of ESG analysis and incorporation
  - stewardship activities with investees and/or with policymakers
  - collaborative engagements
  - attainment of responsible investment certifications and/or awards

The Fund remained focused on strengthening and refining its responsible investment analysis and integration practices. The Fund developed a new Responsible Investment Policy. Three projects outlining priority activities to uplift key responsible investment analysis and integration practices were also developed. In addition, the Fund refreshed its understanding of the role of ESG considerations have in its member's investment option decision making process.

Climate change continued to receive increasing focus during the year.

Management of climate-related risks is embedded in the Investment Governance Framework, the Investment Philosophy and investment strategy, Responsible Investment Policy, stress testing and scenario analysis, investment manager ESG assessments and engagement with investee companies.

As part of its commitment to transition the portfolio to net zero emissions by 2050, the fund commenced preparations to undertake more detailed assessment and reporting of its climate related risks and strengthen its transition plan. Climate change also remained a core thematic of the active ownership program. The fund also continued to consider investment opportunities which have the potential to support a clean energy future.

## Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

As the size and complexity of the fund continues to grow over the next 2 years, we will continue to build on the existing asset class integration, active ownership, modern slavery risk management, and climate change risk management practices. In addition, we look forward to updating members on our progress through enhanced reporting and communications.

**Does your organisation have governance processes or structures to ensure that your overall political engagement is aligned with your commitment to the principles of PRI, including any political engagement conducted by third parties on your behalf?**

☒ (A) Yes

Describe how you do this:

It is embedded in the Fund's Responsible Investment Policy and must be consistent with the Fund's regulatory obligations and duties under the SIS Act and APRA Prudential Practice Guide SPG 530:

The Fund will engage to influence standards, guidelines and regulatory reform that support long term value creation. Where appropriate, the Trustee will participate in advocacy initiatives which support the development of industry standards and regulatory reform that protect the Fund's members financial interests.

While the Fund is accountable for its own responsible investment program, participation in industry networks and forums can help to maximise the Fund's voice and influence on responsible investment issues.

This improves the efficiency of the Fund's investment activities and advocacy, which is in the best financial interests of members.

In addition, the majority of Hostplus policy activities are undertaken through service provider ACSI. As a member of ACSI, Hostplus is represented on its Board and Member Council. Through these channels, Hostplus has the opportunity to provide input to the direction of ACSI's advocacy activities.

ACSI collaborates with other industry groups on certain areas of policy advocacy. We joined a cross-section of industry organisations to sign a joint submission on implementation of the ISSB standards and to call for the passage of the Climate Change Bill. ACSI further collaborated with the Responsible Investment Association Australasia (RIAA), and the Investor Group on Climate Change (IGCC) on other aspects of advocacy including in relation to the introduction of mandatory climate related reporting in Australia. In addition, ACSI participated in a joint finance industry statement welcoming the Government's proposed Safeguard Mechanism reforms.

**Has your organisation identified climate-related risks and opportunities affecting your investments?**

☒ **(A) Yes, within our standard planning horizon**

Specify the risks and opportunities identified and your relevant standard planning horizon:

The climate change risks have been identified over an 11-30+year time horizon.

The Fund has identified the financial risks specific to each asset class under three different climate change stress test scenarios. In addition, the Fund has identified sectors that may be disproportionately impacted by a transition to a low carbon economy.

The Fund's infrastructure managers have assessed and identified assets that have exposure to direct physical climate risks. These risks are considered as part of the asset acquisition process.

The Fund has identified sectors that are likely to benefit under a transition to a low carbon economy and is seeking to increase its exposure to these sectors.

As part of developing the fund's climate change strategy the Fund has identified sectors and assets that would contribute significantly to achieving the fund's climate goals.

**Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?**

**● (A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities**

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

The Fund considers climate-related risks as part of the investment strategy, including the strategic asset allocation, as a structural thematic alongside a range of other risks. Hostplus' Board reviews and approves the investment strategy, which guides investment allocation decisions, annually, at minimum.

**Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?**

☒ **(A) Yes, we have a process to identify and assess climate-related risks**

**(1) Describe your process**

The Fund undertakes regular monitoring of the emissions associated with its investment portfolio. This analysis enables asset classes, investment managers and assets with a relatively higher emissions intensity (and therefore higher climate-related risks) to be identified. Both directly and through engagement service providers, the Fund encourages the companies that it invests in to report in line with the TCFD recommendations.

The fund tracks and manages its climate related risks as part of its external investment manager selection and monitoring processes. Due diligence on external investment managers involves assessment against key criteria including ESG considerations, inclusive of climate change. After appointment, external investment managers continue to be assessed against key criteria including ESG considerations, inclusive of climate change. After appointment, external investment managers continue to be assessed against key criteria including ESG considerations, inclusive of climate change.

For Australian and international listed equities holdings, the Fund subscribes to both the ACSI and Hermes EOS' proxy voting advisory services, which provide analysis of and voting recommendations for investee company meetings.

ACSI and Hermes EOS consider company progress on managing and disclosing climate change risks and opportunities as a part of their proxy voting recommendations for high risk and emissions-intensive companies. Through ACSI, we engage with high risk and emissions-intensive companies in the ASX300. Through Hermes EOS, we engage with international equities regarding climate-related risk and track progress using a milestone system.

We track and manage climate-related risks affecting our investments also through our membership with ACSI where we engage with high-risk and emissions-intensive companies in the ASX300. ACSI also considers companies' progress for managing and disclosing climate change risks and opportunities as part of their proxy voting recommendations for high-risk and emissions-intensive companies in the ASX300.

As outlined in ACSI's Climate Change Policy, where companies consistently fall short of investor expectations around climate change governance, strategy and disclosure, ACSI may recommend its members to vote against directors of ASX200 companies, on a case-by-case basis and will focus on the individual directors most accountable for oversight of climate-change related risks (for example, Chair of the board, Chair of the Risk and Sustainability committee or similar). As always, ACSI's recommendations are combined with direct company engagement.

ACSI's Climate Change Policy is outlined in the following link: <https://acsi.org.au/policies/climate-change/>.

**(2) Describe how this process is integrated into your overall risk management**

The Fund recognises that climate-related risks present in many ways, including physical risk (such as damage to assets and property particularly from more severe weather events), transitional risk (which could include risks associated with financial and regulatory adjustments as a result of climate mitigation policies), and litigation risk. These risks can impact the performance of investment portfolios including through changes to asset values or revenue, and costs arising from regulatory changes as the world transitions to a low carbon economy. Consequently, climate-related risks are incorporated into these traditional risks, where relevant (e.g. credit risk, market risk, liquidity risk or operational risk). Climate risks are prioritised based on their relative materiality, as defined by our organisation's materiality analysis. All risks, including climate risks, are prioritised based on their risk level, as defined by the Fund's likelihood and consequence matrix. The Fund includes climate-related risks within the enterprise risk management system, recognising that climate change has the potential to impact the Fund and its members by way of financial, physical, transitional, regulatory, member retention and reputational risks.
